INTRODUCTION

The FY2010 Unified Planning Work Program (UPWP) of the Grand Valley Metropolitan Council (GVMC) defines transportation planning and related tasks to be accomplished in and for the Grand Rapids Metropolitan Area, regardless of funding sources or responsible agencies during the Fiscal Year beginning October 1, 2009 and ending September 30, 2010. The Grand Valley Metropolitan Council became the MPO in January 1992. The UPWP includes the budget for all federally assisted transportation planning activities that will be undertaken by its Transportation Division, the Interurban Transit Partnership (ITP) and the Michigan Department of Transportation (MDOT). It must be submitted annually to the sponsoring federal agencies prior to October 1st. This is consistent with Section 134 Title 23, USC, Title 49, Section 613.1, "The Statewide Transportation Planning; Metropolitan Transportation Planning; Final Rule" of Wednesday, February 14, 2007 (Federal Register), the Safe, Accountable, Flexible and Efficient Transportation Equity Act: Legacy for Users (SAFETEA-LU). The UPWP outlines the objectives and products resulting from transportation planning work tasks, as well as anticipated task funding and estimated Staff hours.

The Transportation Division receives its local match through dues assessed to the 31 participating member agencies. The agencies appoint representatives to the Technical and Policy Committees. Recommendations from these agencies are sent to GVMC, according to the Rules of Procedure.

ITP is a separate transit authority that has responsibility for providing public transportation. Its mission statement is "to provide for the mobility of people through a family of highly valued transportation services."

The study area boundaries expanded in June of 1992 to include all of Kent County and four urban townships in Ottawa County. This designation was consistent with the requirements of the 1990 Clean Air Act Amendments (CAAA) and the 1991 Intermodal Surface Transportation Efficiency Act (ISTEA). All future transportation plans must now include the area contained within the Metropolitan Area Boundary (MAB).

GVMC and ITP coordinate activities to carry out the federally mandated transportation planning process within the MAB. The activities undertaken in the GVMC Program principally relate to overall program management and fulfillment of federally and state mandated requirements. Other regionally significant activities take place with the cooperation of other participating agencies. GVMC staff provides technical assistance to member communities as needed. Coordination between other modes such as transit, rail freight, rail passenger, airport development and non-motorized transportation are also part of the program responsibilities.

ITP activities, as the region's primary transit provider, target service improvements to the existing transit system as well as promotion of innovative ridesharing alternatives through the Ridefinder Program.

The UPWP contains the following eight divisions:

DATABASE MANAGEMENT- Listing the work tasks needed to monitor area travel characteristics and factors affecting travel such as socio-economic and land use data, transportation system data, and environmental issues and concerns. Priorities include data collection and analysis, and GIS capabilities development and update.

LONG RANGE PLANNING- Identifying transportation system planning tasks related to long range transportation systems planning. Priorities include the development/update of the Long Range Transportation Plan (LRTP), identification of long range needs, and updating and maintaining of the travel demand model.

SHORT RANGE PLANNING- Identifying transportation system planning tasks related to short range transportation systems planning. Priorities include the development/update of the Transportation Improvement Program, providing technical assistance to MPO members, Intelligent Transportation System (ITS) planning, Safety planning, non-motorized planning, and managing the Ozone and Particulate Matter Action! Program.

TRANSPORTATION MANAGEMENT SYSTEMS- Listing the work tasks needed to monitor area travel characteristics and factors affecting congestion and pavement conditions. Priorities include collecting transportation system data and analysis, coordination with MDOT and local transportation providers, development of congestion and pavement investment plans, and implementation and monitoring of ITS solutions. GVMC is also involved in a statewide effort to develop, collect data, and implement Michigan's Asset Management System.

RIDESHARING- Identifying work plans to meet the goals of Business Transportation Services. Priorities include providing information options to the single occupant vehicles, promoting shared ride arrangements and assistance to employers and organizations, conducting ride share promotions, and developing employee transportation programs.

SPECIAL SERVICES PLANNING- Identifying transportation system planning tasks related to transit short and long range public transportation planning. The ADA Planning/Compliance to plan and implement policies, procedures and training methods for increasing transit-related to the Americans with Disabilities Act awareness and compliance, Human resource planning, community information and education, long range planning, and Website Development.

PROGRAM COORDINATION- Describing task functions required to manage the transportation planning process on a continual basis, including program administration, development, review, and reporting. Priorities include the UPWP, public involvement, environmental justice, timely submittal of documents, MPO scheduled meetings, and coordination with all MPO member units.

LAND USE & TRANSPORTATION COORDINATION – To identify and undertake activities to more effectively link land use decision-making throughout the region with

the creation and adoption of the Long Range Transportation Plan and to guide elements chosen in the Transportation Improvements Plan. The scope of this activity is limited to the MPO boundary area. Priorities include Committee meetings in public sessions to review the progress being made, emphasis on successful efforts and encouragement of local government's participation, generating reports to Metro Council, socio-economic data, and public education and information.

In addition to a brief description of objectives and work products, the UPWP identifies financial participation of funding agencies, and responsible agencies associated with each task. In this way the UPWP becomes the basis for documenting federal, state, and local participation in the continuing, cooperative, and comprehensive GVMC transportation planning process. The UPWP is approved by the Federal Highway Administration (FHWA) and is used to monitor the expenditure of FHWA PL funds (PL), Congestion Mitigation Air Quality Program (CMAQ) funds, Surface Transportation Program (STP) funds, and Federal Transit Administration (FTA) Sections 5303 and 5307 funds. This UPWP also serves as an indispensable management tool, enabling the GVMC to manage and administer its planning responsibilities with available program revenues.

MAJOR TRANSPORTATION ISSUES

The metropolitan planning process establishes a cooperative, continuous, and comprehensive framework for making transportation investment decisions in metropolitan areas. Local elected officials, in cooperation with the State and transit agencies, are responsible for determining the best mix of transportation investments to meet metropolitan transportation needs. MPOs are responsible for developing and adopting the Long Range Transportation Plan (LRTP), the Transportation Improvement Program (TIP) and the UPWP.

The FY2010 UPWP is governed by federal and state mandates from the 1990 CAAA, Sec 134 Title 23, USC, Title VI Civil Rights Act, and the Americans with Disabilities Act. Specific examples are explained in the following program items: Traffic Volume and Physical Condition, Pavement Management System, Congestion Management System, Asset Management System, Intelligent Highway System, Safety Planning, Air Quality Planning, Public Involvement/Environmental Justice, Special Services Planning, Americans with Disabilities Accessibility Training, and Public Information and Training.

The Blueprint Committee, appointed by the Metro Council, is an oversight committee to promote the implementation of the Metropolitan Development Blueprint (MDB) and its further development and evolution. The Blueprint Committee will continue to work to create a new regional perspective in local land use and coordinate infrastructure planning. It is pursuing, jointly with local governments, the creation of a new regional development plan through which Metro Council can help coordinate local government planning efforts and provide instructive use of Blueprint visions and principles through the regional framework process as adopted by GVMC.

An important and strategic process for transit is implementing the Mobile Metro 2020 recommendations as adopted by ITP and recognized by GVMC for improving public transportation, as included in the Long Range Transportation Plan. The charge of ITP's Board and the community leaders is to coordinate public transit initiatives, seek public input, build public awareness and support, and ensure that transit initiatives can be done.

The budget includes funding for implementation of a public participation program in compliance with SAFETEA-LU. A public participation plan that allows for early public information in the Transportation Improvement Program and the Long Range Transportation Plan were developed by GVMC previously. GVMC will also address Environmental Justice and develop/update a process to reach out to minorities and low income families to provide them better mobility and accessibility to the transportation system in compliance with Title VI of the 1964 Civil Rights Act (42 U.S.C 2000d-1), and SAFETEA-LU planning regulations.

The budget also includes funding for a non-motorized planning program, in compliance with SAFETEA-LU. A non-motorized plan will be developed/updated that allows for early project development and funding through the long range transportation planning process and the Transportation Improvement Program.

The budget also includes funding for implementation of a safety conscious planning program, in compliance with SAFETEA-LU. A safety improvement plan will be developed that allows for early project development and funding through the long range transportation planning process and the Transportation Improvement Program.

GVMC will continue its responsibility to upgrade and maintain the travel demand model. This task will include maintaining up-to-date traffic information that covers the federal aid system. The task also includes developing and updating a mode split model which will provide GVMC with multi-model travel demand forecasting capabilities.

GVMC will participate in studies identified in the 2035 Long Range Transportation Plan. These studies will be undertaken cooperatively with MDOT and the Transit Agencies. Staff will perform the technical work with the travel demand forecasting model. GVMC will continue its involvement with the ITP public transportation corridor study.

GVMC staff will work closely with local officials, interest groups, state, and federal transportation partners to further integrate freight planning into the transportation planning process. Staff will work with stakeholders to inventory and monitor freight routes and intermodal facilities within the metropolitan area. Staff will also monitor freight related issues and seek input from freight stakeholders on how to best integrate freight planning into the existing transportation process.

GVMC, through the transportation committees, will continue participation in implementing the Revised Planning Process developed jointly with the MDOT and the Federal Highway Administration (FHWA). The implementation process is a cooperative partnership with MDOT, FHWA, and the Transit Agencies.

GVMC, through the transportation committees, will continue participation in developing and implementing of Intelligent Transportation Systems (ITS) jointly with the MDOT and the Federal Highway Administration (FHWA). The implementation process is a cooperative partnership with MDOT, FHWA, and the local transportation providers.

GVMC staff will continue to provide technical assistance to its member units of government. Calculating future travel demand for application to the Transportation Economic Development Fund and for analysis of impacts of development are examples of this type of work.

Many program items that are part of the continuing administration and management of the program remain unchanged.

GVMC, through the transportation committees and in coordination with ITP, MDOT, FHWA, and the public, will maintain and update as needed the 2035 Long Range Transportation Plan. The plan covers all modes of transportation needs.

GVMC, through the transportation committees and in coordination with ITP, MDOT, and FHWA and the public, will develop a new SAFETEA-LU compliant FY2011-2014 Transportation Improvement Program (TIP). GVMC will also maintain and update as

needed the 2008-2011 TIP.

The Revised Planning Process

The Revised Planning Process developed jointly with the MDOT and the Federal Highway Administration (FHWA) was adopted by GVMC in 1998. GVMC staff along with MDOT and all transportation providers within the metropolitan area boundary have worked very diligently to implement this process given the tremendous amount of fundamental changes that had to take place in the way we do transportation planning. Since ISTEA was enacted the MPO has embarked on the development of planning tools and processes to achieve this task. GVMC has developed a pavement and congestion management system to help prioritize projects based on need. GVMC also developed and maintains the travel demand forecasting model for existing and future travel demand forecasts and analyses. The travel demand model output is then utilized to predict existing and future congestion (i.e. TIP). The management systems are then used to develop short and long range transportation investment strategies and hence short range investment plans. The process also allowed GVMC staff to communicate and coordinate more often and on a regular basis with the state and other transportation providers. The process emphasis is on early involvement in the development stages by local transportation providers and the public. The process also requires that the MPO and the state develop a financially constrained Long Range Transportation Plan and TIP. Most planning tasks in the UPWP are designed to help GVMC staff continue the implementation and practice of the process. GVMC staff along with the transportation committees, state, and FHWA will continue to seek improvements to the process where deemed needed (see Appendix, page 48).

The MPO staff and committees will continue to integrate planning processes used by MDOT, ITP, and GVMC as called for by the Revised Planning Process. The MPO staff will schedule a series of meetings, if needed, with MDOT, FHWA, ITP and the transportation committees to review the status of implementing the Revised Planning Process. These meetings will review what has been implemented to-date and what steps need to be taken to successfully complete the implementation of each step of the Revised Planning Process.

The MPO staff along with participating agencies will review the process during the fiscal year and will make changes to it if needed. The goal of these meetings is to develop an understanding and a methodology to fully implement the revised process for the Grand Rapids planning area. Discussions will include, but not limited to, integrating management systems, MPO area revenue estimates which will include methodology and deadlines, integrating early planning discussions and cooperation between the MPO, MDOT (Lansing and the Grand Region), and ITP. We will also develop a comprehensive LRTP and TIP development and amendment process. The MPO, MDOT, and ITP, upon completion of this task, will adopt the implementation steps and revisions as a part of the Revised Planning Process.

The UPWP work tasks, where applicable, will assess the status, identify changes, actions needed, budget, and staff times to successfully implement the process.

Justification for the Level of Planning Effort Designated in the UPWP

The level of planning effort for the Grand Valley Metropolitan Council MPO is driven by the 2035 Long Range Transportation Plan and other operational planning needs of the various modal operating agencies and the state and federal requirements, among which are, SAFETEA-LU, various statutes from the state and federal level, the Revised Planning Process, the Americans with Disabilities Act, responses to Certification Findings by Federal Highway Administration (FHWA), and MDOT. Increased staff time and computer resources are now being devoted to more transit planning and concerns, intermodal planning, congestion management, pavement management, safety planning, ITS, freight transportation planning, environmental justice, and needs of the transportation disadvantaged. Reference to the proposed funding table and previous year expenditures shows that staff efforts, consultant contracts, and increased interagency participation in the UPWP will ensure and assure management of planning resources in the UPWP. The SAFETEA-LU identified eight broad areas to be considered by MPOs in developing plans and programs which are reflected in the various tasks of the UPWP. Those factors are:

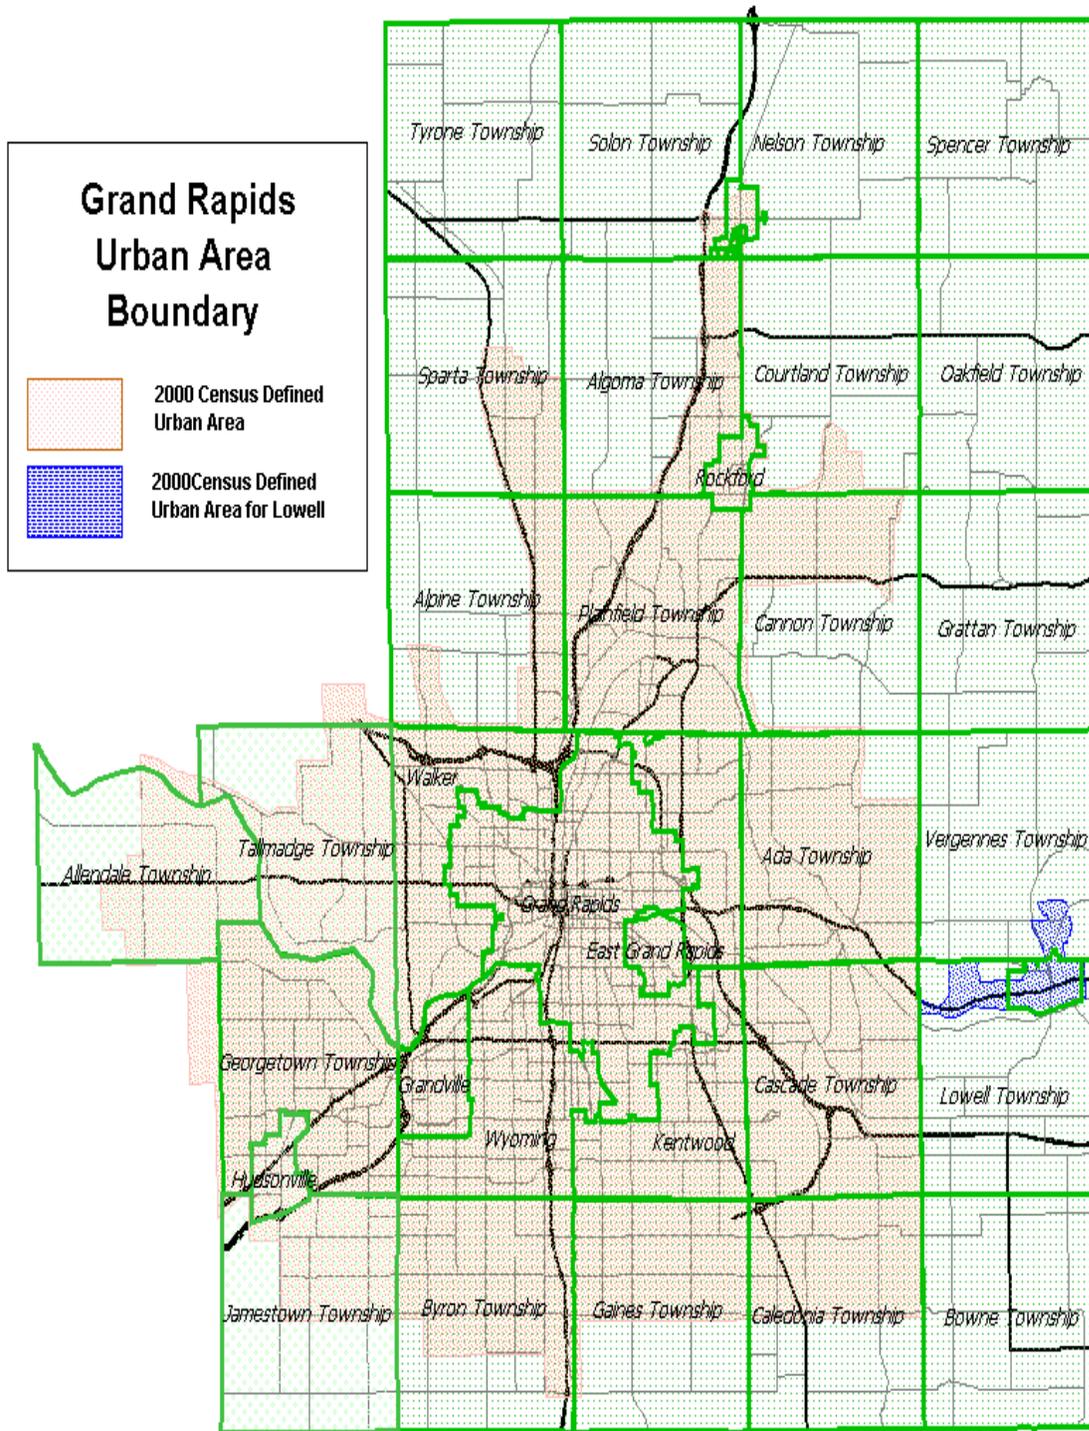

- Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
- Increase the safety of the transportation system for motorized and non-motorized users;
- Increase the security of the transportation system for motorized and non-motorized users;
- Increase the accessibility and mobility of people and for freight;
- Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;
- Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
- Promote efficient system management and operation, and
- Emphasize the preservation of the existing transportation system.

Table 1 depicts SAFETEA-LU planning areas and the applicable UPWP tasks.

GVMC Study Area Map

Interurban Transit Partnership (ITP)

ITP will continue to expand the Business Transportation Services (BTS), formerly known as the RIDEFINDER (Task 5.0) efforts as this program enters its second year as part of the Authority's services. Under the BTS program, ITP staff will continue to assist employers in developing and implementing rideshare programs, contribute marketing strategies and materials to employers to promote ITP services, research, analyze and recommend solutions to employee transportation problems, develop Employee Transportation Programs for interested employers and provide ongoing assistance to employers who currently promote ITP services. In addition to employer marketing, ridesharing services will also be marketed to the general public. A telephone survey of rideshare database applicants will also be administered in FY2008 along with post match surveys to determine participation rates of program activities.

ITP's long range planning effort will continue during this fiscal year. The Public Transportation Tomorrow Committee will continue to act as an advisory and coordinating body to guide in the implementation of the long range public transportation plans and visions for the metro area. Taking concepts from the Metropolitan Development Blueprint and coordinating with the GVMC Long Range Transportation Plan, ITP will continue to create and evaluate visions of what a multi-modal transportation system will look like and how it will impact mobility and development of the Grand Rapids region well into the 21st century.

Public transportation short range planning will guide the provision of effective and efficient services through analysis of service needs, performance, and alternative strategies for service over the next five years. ITP will update the current Short Range Public Transportation Plan. This task will also involve planning for any service changes in linehaul and paratransit services. This will include evaluation of current services and ridership development of standards of measures. New service expansion alternatives will be developed as appropriate. A financial plan will be developed for the use of federal/state/local funds over a five year period. ITP will continue to work with the Grand Rapids Public Schools to ensure that the highest quality of service will be provided to students as well as to the general public.

Special Services Planning will include

- ADA planning and Compliance: To plan and implement policies, procedures and training methods for increasing transit-related Americans with Disabilities Act awareness and compliance.
- Community Information and Education: Activities designed to reach stakeholders in the community and the general public.
- Kent County Latent Demand Transit Study: To assess the needs of those not currently served by public transportation as a basis for determining an appropriate level of service supported by the general public. As part of this effort, ITP will promote existing services, identify unmet needs, and work to design solutions to improve the mobility of all residents of Kent County.
- WEBSITE Development/Upgrade: Additional upgrades/enhancements needed to the existing website, primarily incorporating a trip-planning function and integrating the components of the ITS system that will allow users direct access

to real-time information on detours, schedules, etc.

- ITS Planning: To analyze ITS technologies that could be implemented on fixed routes, paratransit and rideshare/vanpool programs.
- Long Range Planning: Activities will include updating the Annual Service Plan, and the Five-Year Plan updates of the Long Range Plan.

ITP will participate in the development and updating of the Transportation Improvement Program in cooperation with GVMC. ITP will also participate in the development of the Unified Work Program which will enable ITP staff to develop an annual program of planning activities for inclusion in the GVMC Unified Planning Work Program for the Grand Valley Metropolitan Area.

Funding Categories for FY2010 Planning Activities

GVMC

For FY2010, GVMC will continue to receive planning assistance funds from the Federal Highway Administration (FHWA PL Funds). In addition, GVMC will receive funds from the Federal Transit Administration (FTA Section 5303), Surface Transportation Program (STP), Congestion Mitigation Air Quality Program (CMAQ), and local funding for matching federal funds as set by law.

FHWA PL Funds: These planning assistance funds continue to be the dominant form of funding for the GVMC transportation program. The FY2010 appropriation is estimated at **\$803,591** which does not include funds unspent from FY2009. This fiscal year **\$712,693** is programmed from PL Funds. The local match is based on the 81.85/18.15 federal matching requirements.

FTA Section 5303 Funds: A total of **\$205,636** is budgeted for FY2010. The FY2010 appropriation is estimated at **\$207,524** which does not include unspent funds from FY2009. Section 5303 monies are provided on an 80/20 matching basis, with 20 percent of the total cost from non-federal sources.

STP Funds: A total of **\$249,643** is budgeted for FY2010 which does not include unspent funds from FY2009. STP monies are provided on an 81.85/18.15 matching basis, with 18.15 percent of the total cost from non-federal sources.

CMAQ Funds: A total of **\$80,018** is budgeted for FY2010 which does not include carry over funds from FY2009. GVMC will use CMAQ funds to support the Ozone Action! and Particulate Matter Program. CMAQ monies are provided on an 80/20 matching basis, with 20 percent of the total cost from non-federal sources.

SPR Funds: No SPR funds are budgeted for FY2010.

Indirect allocation costs which include items like administration salaries, rent, computer equipment and supplies, amount to **\$415,857**.

The Grand Valley Metropolitan Council MPO members will provide local match funds (**\$284,808**) for the related MPO activities specified in this document.

ITP

The upcoming fiscal year, FY2010, ITP has programmed funds for UPWP activities from four different sources: FTA Section 5307, formerly known as Section 9, the Michigan Toll Revenue Credit Fund(TRC), the Congestion Mitigation/Air Quality (CMAQ) program, and ITP local government contributions. Additional information concerning section 5307 funds is provided below.

FTA Section 5307 Funds: FTA permits the use of Section 5307 funds not designated for operating assistance to supplement other funding in support of planning activities. For FY2010 **\$1,125,000** is budgeted from Section 5307. All Section 5307 funds programmed for FY2010 UPWP activities will be needed to complete this work, and no carryover monies from the FY2009 program will be available for use in FY2010.

Section 5307 funds must be matched with a 20 percent non-federal share. For FY2010, a 10 percent share will be provided from TRC funds budgeted for planning work. A total of **\$140,625** is budgeted from this source in FY2010. The remaining 10 percent (**\$140,625**) will be provided from ITP local government contributions.

Ridesharing: Continuation of rideshare services and funding are included in the FY2010 UPWP under the RIDEFINDER program. A total budget of **\$154,822** has been allocated to support rideshare services. The funding for this program is 100% federal. ITP will utilize these funds to operate the BTS program in-house.

1.0 DATABASE MANAGEMENT

1.1 Demographic and Economic Projections

Objective

Monitoring community development, collecting demographic and development information, and maintaining up-to-date Traffic Analysis Zone (TAZ) records are the primary purpose of this work item. To provide information to local units of government officials and the public as requested. Use the data as input to long and short range planning studies. Staff will use the Regional Geographic Information System (REGIS) to store and graphically display the data.

This activity will provide data to the travel demand model, technical tool, used in the Revised Planning Process.

Procedures and Tasks

Maintaining accurate demographic and development information for the metropolitan area is an ongoing activity of GVMC. Staff will work in cooperation with the GVMC Land Use department to collect Land use plans throughout the MPO study area, and collect data from the U.S. Census Bureau to assess the latest population data. TAZ data will be updated as necessary and maintained in a computerized geographical information data base management system.

Products

Imported Census data, TAZ demographic and employment projections for the MPO study area, SE data set for the MPO members and general public for use in various studies for estimating future traffic volumes trends. This information will also provide input for area-wide and sub-area data for the travel demand model for traffic impact studies. Maps, chart and reports of census and TAZ data will be presented to GVMC committees and other interested parties.

Budget

Funding Source	Funding Amount	Performing Agency - GVMC	
STP	\$0.00	Person Weeks	18.50
PL-112	\$13,745.10	Salaries	\$15,058.60
CMAQ	\$0.00	Fringes	\$5,008.48
MDOT-SPR	\$0.00	Direct Cost	\$0.00
FTA-Sec 5303	\$13,434.42	Indirect Cost	\$13,518.98
GVMC- Match	\$6,406.54	Contractual-SPR	N/a
ITP-Match	N/A	Contractual-STP	N/a
STP-FLEX	N/A	Contractual-PL-112	N/a
		Contractual-Sec-5303	N/a
TOTAL	\$33,586.06	TOTAL	\$33,586.06

1.2 Traffic Volumes and Physical Conditions

Objectives

Monitoring existing traffic volumes on the major street network of the GVMC area for project development, scheduling, and technical assistance studies are part of this work item. Responding to requests from the public for traffic count information and assisting MDOT with collecting information for the State Needs Study will also be done. Data collection efforts within this task also include the Highway Performance Monitoring System (HPMS), which is used for national trends and for air quality conformity monitoring. Furthermore, the data collected will support the implementation of the Revised Planning Process.

This activity will provide data to the travel demand model, technical tool, used in the Revised Planning Process.

Procedures and Tasks

Monitoring traffic volumes and preparing long range projections is a major activity of the GVMC. The GVMC initiated a comprehensive annual traffic counting program in 1994. In addition, the GVMC will maintain current and historic traffic counts in a computerized data management system. This allows for easier access to available information and an efficient means of calculating trends. The GVMC will provide traffic count data to MDOT for the HPMS submittal. Staff will use the Regional Geographic Information System (REGIS) to store and graphically display the data.

Products

Traffic volume and physical condition information will provide input to several GVMC work items, such as: the TIP, Technical Assistance, and HPMS. Also, information collected this year will be incorporated into a comprehensive update of the traffic count map.

Budget

Funding Source	Funding Amount	Performing Agency - GVMC	
STP	\$0.00	Person Weeks	25.00
PL-112	\$50,165.37	Salaries	\$20,754.25
CMAQ	\$0.00	Fringes	\$6,902.85
MDOT-SPR	\$0.00	Direct Cost	\$15,000.00
FTA-Sec 5303	\$0.00	Indirect Cost	\$18,632.29
GVMC- Match	\$11,124.03	Contractual-SPR	N/a
ITP-Match		N/A Contractual-STP	N/a
STP-FLEX		N/A Contractual-PL-112	N/a
		Contractual-Sec-5303	N/a
TOTAL	\$61,289.40	TOTAL	\$61,289.40

1.3 Transportation Geographic Information System Maintenance & Update

Objectives

The primary objective of this work item is designed to update and expand the GVMC database for the Transportation Geographic Information System (TGIS) developed in 1997. The TGIS incorporates all of the transportation-related databases into a TransCad/GIS platform. The objective of this work item will be to verify that the data in the TGIS is current and as up to date as the data itself. In addition, additional information will be added to the TGIS under this work item, such as, data for the pavement and congestion management systems, and other various transportation variables. Staff will also work with the Regional Geographic Information System Division (REGIS) to develop, build, and input all transportation data and planning tools for the Grand Rapids Metro Area into the REGIS system. Staff will coordinate efforts with the consultant to convert and digitize all transportation-related data and maps to the REGIS platform (ARCINFO). This activity will provide mapping data and manage the transportation system as a technical tool used in the Revised Planning Process.

Procedures and Tasks

The procedures used to update the TGIS will be to manually check each of the links in the database for accuracy when compared to the stand-alone transportation databases. Traffic Count Data, socio-economic data, and other pertinent data will be checked and verified as it changes or as time allows for existing data. Staff will meet with various agencies and REGIS to develop a comprehensive database and planning applications/interfaces for the MPO. GVMC will contract with REGIS to update pavement management data and traffic count data on the regional GIS system.

Products

The product shall be a current TGIS database to be used in everyday planning activities. A REGIS database, which will provide GIS covering for the entire MPO area.

Budget

		Funding Source	
STP	\$181,659.50	Person Weeks	29.10
PL-112	\$26,019.28	Salaries	\$25,914.30
CMAQ	\$0.00	Fringes	\$8,619.08
MDOT-SPR	\$0.00	Direct Cost	\$0.00
FTA-Sec 5303	\$20,807.33	Indirect Cost	\$23,264.77

2.0 LONG RANGE PLANNING

2.1 GISPlus/TransCad Model Maintenance & Update

Objective

To continuously increase the accuracy of the travel demand forecasting model by updating the input data with current up-to-date information and performing validation runs. The GVMC will expand the model to cover additional four townships in Ottawa County.

To continue the development of mode split forecasting capabilities for GVMC and ITP to use in the update of the 2035 Intermodal Long Range Transportation Plan.

To incorporate long range plans for non-motorized facilities, freight movement and transit in the 2035 Long Range Transportation Plan.

Procedures and Tasks

Use revised Census data to refine trip generation rates and trip lengths. Perform speed studies to verify model speeds and input into the Air Quality model. Produce summaries of the results and validation report.

Products

A technical memorandum which will describe the process used in expanding, maintaining, updating, and validating the model.

A Technical report detailing the model results.

Plots and other displays of the network.

2.2 2035 Long Range Transportation Plan

Objectives

To develop/update the 2035 Long Range Transportation Plan, to incorporate updates/modifications related to motorized and non-motorized transportation plans, freight movement, congestion management and pavement management plans, and transit. The 2035 LRTP provides an opportunity to develop cost effective solutions to improve mobility and the deficiencies identified in the LRTP in compliance with SAFETEA-LU requirements.

Procedures and Tasks

Use 2000 Census data and land use master plans to refine/update air quality analysis years S.E. data. The data will be developed/updated jointly by staff and GVMC members. Staff will use the travel demand model along with other related data to update and maintain the 2035 LRTP. Staff will work with MDOT and ITP to integrate all planning efforts to develop a unified planning process to develop/update the LRTP. MPO staff will work closely with local officials and interests to inventory and monitor freight routes and intermodal facilities within the metropolitan area. Input from freight stakeholders will be sought by MPO staff and considered to successfully integrate freight planning into existing transportation planning processes.

Products

An up-to-date 2035 Long Range Transportation Plan/updates report that will identify all revisions/amendments needed in the plan for programming future Transportation Improvement Programs.

A summary report for wide distribution.

A technical report that documents the process and findings.

3.0 SHORT RANGE PLANNING

3.1 Transportation Improvement Program (TIP)

Objectives

The GVMC will develop a new SAFETEA-LU compliant FY2011-2014 Transportation Improvement Program (TIP). The GVMC will also maintain and update as needed the 2008-2011 TIP. The GVMC will develop/maintain a Four-year program of transportation projects which includes roadway projects and public transportation operating and capital assistance projects that reflect multi-modal transportation needs in cooperation with ITP and in compliance with SAFETEA-LU regulations. Project selection process will adhere to the Revised Planning Process developed jointly by the MPOs, state and FHWA.

Procedures and Tasks

GVMC staff will work with MDOT, ITP, and FHWA to develop a new 2011-2014 TIP and implement the FY2008-2011 TIP during FY2010. Staff will monitor and update/amend the 2008-2011 TIP as required by the participating agencies. GVMC staff will monitor the progress of projects throughout the year to assure that federal funds returned to the area will be spent in a timely manner. GVMC staff and committees in cooperation with MDOT, ITP, and FHWA will develop the FY2011-2014 TIP as required by SAFETEA-LU.

GVMC and Transit Authority staff will review annual capital equipment and facilities needs in relation to previous and current programs, including short-range transit planning efforts. Operating assistance projects will be based on projected service levels and funding requirements.

Products

An up-to-date four-year FY2008-2011 TIP of local and state transportation projects, which includes roadway and public transportation operating and capital assistance projects, for the FY2008-2011 period in compliance with (SAFETEA-LU). Annual listing of TIP projects according to SAFETEA-LU. A new SAFETEA-LU compliant 2011-2014 TIP

3.2 Technical Assistance

Objectives

Provide technical assistance to GVMC member communities and MDOT as requested, to improve traffic flow and safety and/or to assess the traffic impact of proposed developments on major corridors. Review and respond to air quality conformity guidelines being issued by the EPA and state DEQ. Participate in the implementation of the revised State Implementation Plan. A Latent Demand Transit study jointly with ITP and MDOT.

Procedures and Tasks

Technical assistance is a long standing service provided by GVMC. This service has typically consisted of traffic impact studies, level of service analysis along corridors and/or intersections, site plan review assistance, and air quality planning. Technical assistance will also include assisting member governments and agencies to prepare documentation for projects submitted to the Michigan Transportation Economic Development Fund. Staff will also be involved in developing a safety profile for this region along with other stakeholders. GVMC will hire a consultant to perform the transit latent demand study.

GVMC staff will be involved in the following tasks:

- A - Corridor Advisory Boards
 - 1 - East Beltline Land Use Advisory Committee
 - 2 - 28th Street Corridor Development Committee
- B - Air Quality Planning
- C- WESTRAIN
- D- A Latent Demand Transit Study

Products

Documentation related to services provided will be described and included in monthly progress reports.

3.3 Ozone and Particulate Matter Action Program

Objectives

This project is designed to provide public education and information to encourage voluntary actions to help maintain seasonal ozone air quality and annual particulate matter standards in Kent and Ottawa Counties.

To supplement GVMC/MDOT/MDEQ ongoing activities and responsibilities with regard to air quality planning under the Clean Air Act Amendments of 1990, and SAFETEA-LU.

Procedures and Tasks

Tasks which will be undertaken by GVMC are:

- educational information programs for local governments, business and industry
- educational information programs for K-12 curriculum
- media relations to help notify the public of ozone action and particulate matter days
- contract with media outlets to promote public education to help get the message out correctly
- website maintenance
- public survey to determine the level of outreach and interest in the Ozone Action Program

Products

Public service announcements, advertising, promotion of ridesharing and use of public transit, a variety of products related to public education materials will be produced, and a summary of activities undertaken during the previous year.

3.4 Intelligent Transportation System (ITS) (Amended)

Objectives

To develop and implement ITS technologies according to the regional ITS deployment plan. Develop and evaluate ITS implementation strategies in the area. This will be a comprehensive approach for state and major local roads.

Procedures and Tasks

An ITS committee made up of representatives from all affected local units of government will lead an effort to update and implement the area's ITS deployment plan. This project will involve a review of existing infrastructure, resources, policies and practices in surface transportation operations as they relate to ITS implementation and operation. It is anticipated that the project will lead to the establishment of a framework and formal institutional agreements that will lead to a higher level of integration and coordination among agencies responsible for ITS operations in the region. The project is expected to lead to the implementation of an action plan that can produce both short-term results as well as recommend longer term implementation strategies for the region.

Products

ITS action plan that will provide a list of projects to reduce congestion and to better manage traffic within the GVMC study area.

3.5 Non-Motorized Planning

Objectives

This planning activity is designed to help promote and enhance non-motorized activities within the MPO planning process. To develop a non-motorized plan (bike and pedestrian) as a part of the long range transportation plan. To supplement GVMC ongoing activities and responsibilities with regard to multi-model transportation planning in accordance to SAFETEA-LU.

Procedures and Tasks

Tasks which will be undertaken by GVMC are:

- Educational information programs for local governments
- Update of existing plans
- Development and adoption of uniform standards in accordance with existing local, state, and national standards.
- Public survey to determine the level of interest among the public.

Products

A regional bicycle and pedestrian plan. A list of feasible projects.

3.6 Safety Conscious Planning

Objectives

SAFETEA-LU requires that the metropolitan planning process shall provide for consideration of projects and strategies that will increase the safety and security of the transportation system for motorized and non-motorized users. Safety Conscious Planning (SCP) implies a proactive approach to the prevention of accidents and unsafe transportation conditions by establishing inherently safe transportation networks. SCP achieves road safety improvements through small, but measurable changes, targeted at the whole network. The short-term objective is to integrate safety considerations into the transportation planning processes at all levels, such as the Transportation Improvement Program (TIP) developed by the Metropolitan Planning Organizations (MPOs). There should also be consideration of safety objectives in the longer range, 20 year plans that the MPO prepares.

Procedures and Tasks

Each MPO is to develop a safety profile and to hold a safety forum as a starting point for integrating safety conscious planning into the metropolitan planning process. The next phase is to actually identify the best method for area-wide integration

1. Attendance at a 1 day training seminar on the systematic and organized approach to safety conscious planning.
2. Work with member agencies to identify goals and performance measures.
3. Develop the process and timetable for integrating the goals and performance measures into the project identification and selection process.

PLANNING RELATIONSHIPS:

Safety Conscious Planning is an emerging concept in the transportation industry. It provides an additional basis for managing our infrastructure by focusing on the safety performance of the system in addition to other factors. It is a process predicated on stewardship of public resources, accountability to the users of the system, and continuous improvement.

PRODUCTS:

1. Safety profile
2. Identification and mapping of high crash locations
3. Safety goals(s); safety performance measure(s)
4. Integration timetable

4.0 TRANSPORTATION MANAGEMENT SYSTEMS

4.1 Pavement Management System

Objective

The GVMC Pavement Management System is an essential tool in implementing the Revised Planning Process. The Pavement Management System will be updated for GVMC member agencies which will cover all the federal aid roadway system. The system will allow the local units of government to develop pavement maintenance strategies and priorities for the federal aid system.

This activity will provide the tools and data to prioritize resurfacing and reconstruction projects for the federal aid system as required by the Revised Planning Process.

Procedures and Tasks

GVMC staff and member agencies will review pavement management systems data collected by GVMC staff utilizing the Pavement Data Collection Van. After this review, this information will then be the basis for developing some pavement management system priorities with the MPO concurrence. Staff will upgrade the computer hardware and software as needed to complete this task. The GVMC Transportation Department will contract the services of the Data Collection Van from the Metro Council.

Products

Pavement management data for the federal aid system, deficiency report, software, procedural guidelines, and priorities will be produced.

4.2 Congestion Management System

Objective

Update and maintain the Congestion Management Process for GVMC member agencies using the information collected by the GVMC. Congestion management is one of six management systems still required by SAFETEA-LU for TMAs. The GVMC Congestion Management Process is an essential tool in implementing the Revised Planning Process. The Process will allow the local units of government to develop congestion mitigation strategies and priorities the improvements on the federal aid system. GVMC will also seek to introduce and implement Intelligent Highway System (ITS) solutions/projects according to the ITS deployment plan developed for the region.

This activity will provide the tool and data to prioritize expand and widen projects, as well as improving intersections traffic flow as required by the Revised Planning Process. MPO staff will work closely with local officials and interests to inventory and monitor freight routes and intermodal facilities within the metropolitan area.

Procedures and Tasks

GVMC staff will work in close coordination with MDOT staff in the implementation and updating of the congestion management Process/ITS for the GVMC region. Staff will upgrade computer hardware and software as needed to complete this task. GVMC will continue to contract with the local agencies to collect traffic count data covering the federal aid system.

Products

Congestion management data collection, traffic studies, and procedural guidelines will be produced.

4.3 Asset Management

Objective

Provide technical assistance to the Asset Management Council as required by Public Act 499 of 2002.

Activities

1. Attend a one day training seminar on the use of PASER.
2. Participate as part of a three-person team (including MDOT and City/County) that will rate the federal-aid eligible roads in the region.
3. Provide results of PASER ratings to local agencies for review and revision where appropriate.
4. Publicly display PASER ratings on website or through other public means so that ratings are available for public review and useable for project and plan development activities.
5. Transmit PASER ratings and roadway data (i. e., traffic counts) on forms supplied by the MDOT Asset Management Coordinator.
6. Monitor and report to MDOT Asset Management Coordinator status of projects awarded in the past calendar year.
7. Contract with Counties and Cities for participation in data collection efforts.
8. Coordinate asset management training and demonstration projects within their jurisdictions.
9. Provide other assistance as may be requested by the Asset Management Council.

Products

1. Road network loaded into RoadSoft.
2. PASER data collected on federal-aid eligible roads in the region.
3. Web based or other public display of PASER ratings.
4. Report on PASER and other roadway data and transportation project completion information for the region.
5. List of projects for three (3) years (regardless of funding source) for all Act 51 agencies in the region.
6. Quarterly reports submitted to MDOT Asset Management Coordinator.

5.0 RIDESHARING

5.1 Business Transportation Services

RIDESHARING

Objectives

The rideshare program at the Interurban Transit Partnership is named Business Transportation Services. The goal of Business Transportation Services is to provide alternative commute options to those driving in single occupant vehicles. The primary objective is to promote and implement ridesharing arrangements with vanpools and carpools. Individuals are matched to form shared ride arrangements and assistance is provided to employers and organizations to conduct rideshare promotions and develop employee transportation programs. The results are reduced commuting costs, reduced traffic congestion, reduced parking needs, reduced fuel consumption and reduced air pollution.

Procedures and Tasks

Business Transportation Services offers a variety of options which include designing customized transportation programs for employees. Staff continues to outreach through targeted marketing campaigns that include mailings, presentations to area companies, and development and distribution of marketing materials that promote the benefits of vanpooling and carpooling. Staff also advertises and answers a phone line for individuals to obtain information of vanpooling and carpooling. Contractual funds for Rideshare will be used for consultant help with the design and delivery of a local rideshare campaign to promote alternative commuting in the Grand Rapids, Holland and Allegan areas.

Products

Business Transportation Services provides free carpooling information and matching on The Rapid's new on-line carpooling website entitled Greenride, which is accessed by a link on www.ridetherapid.org. Registration is open to area residents and is free. Information on park and ride lots and transit services and other resources are available at www.ridetherapid.org. The Rapid also operates a vanpool program entitled, RapidVan. Staff surveys company employees to assess the need for alternative transportation and develops programs to meet those specific needs. Quarterly reports are submitted to MDOT describing the activities and projects of the program in extensive detail. Quarterly reports are also submitted to the ITP Board. An annual report is given to the TIP Committee of the Metropolitan Planning Organization.

6.0 SPECIAL SERVICES PLANNING

6.1 ADA Planning/Compliance- Special Services

Objectives

To plan and implement policies, procedures and training methods for increasing transit related American with Disabilities Act (ADA) awareness and compliance.

Procedures and Tasks

Staff, with assistance from local agencies, consultants, as well as the disabled community will develop procedures to ensure compliance with the Americans with Disabilities Act. Procedures include ongoing development of monitoring and review process for all ADA applications, as well as staff training and education. Disability Advocates of Kent County (DAKC) performs all ADA application eligibility reviews. The consultant is a registered occupational therapist (OTR) who makes the initial review of all ADA applications and who follows-up with the applicant or medical/rehab professional if necessary. They make recommendations for which applicants will be seen for an in-person assessment.

Products

A monitoring program of the ADA process to insure that ADA applications are reviewed and processed in accordance with federal guidelines.

6.2 COMMUNITY INFORMATION AND EDUCATION

Objectives

To communicate agency information to the community using a variety of media and outreach.

Procedures and Tasks

We will develop and implement a strategic marketing and communications strategy to reach stakeholders in the community and the general public. Consultants will be utilized to complete surveys regarding service perception and needs. We will also use consultants to develop outreach strategies and materials (design and production) to assist in our outreach efforts.

Products

Materials to include an annual report, a community newsletter, web-based content, and community forums. May include survey or other research work.

6.3 Human Resource Planning

Objectives

To continue Human Resource plans and goals by developing trainings which include EEO annual leadership update, continued advanced diversity and harassment training for all staff, recruitment strategies and updates, management training for new management/supervisory staff, HR policies and procedures training for all staff, implementation of phase II of the wellness program, ongoing ergonomics updates and training, benefit strategies, and investment counseling. Consultant help to assist in reaching EEO and Diversity goals which are required by FTA/EEOC. The research on harassment, diversity, EEO and Civil Rights initiatives which are constantly changing and must be kept up to date in order to keep policies and procedures current and accurate (ADA, Civil Rights, EEOC), updates to handbooks, training of staff and leadership teams and keeping the company apprised of new diversity initiatives in order to remain committed to delivering a fair and pleasurable work environment at *The Rapid*.

Procedures and Tasks

Human Resource staff, along with consultants and other agencies, will assist in developing training programs as indicated above. The above areas of training provide *The Rapid* staff important tools useful in developing ways to keep current or become informed of changes in the workplace, including safety issues; mental health and wellness issues; control benefit costs, employee hiring and retention; and ways to diversify the culture of the organization.

Products

Training provides better health and morale in employees, thus a more productive and conducive workplace.

6.5 LONG RANGE PLANNING

Objectives

Continue work on Short and Long Range Planning activities.

Procedures and Tasks

Staff time will be devoted to update the Annual Service Plan (short-range plan), the long-range plan, both of which provide the blueprint of transit activities for the next five years. Tasks include updating transit database information, collection of National Transit Database data, updating the short and long range transit plans, public outreach effort, education and travel, and collection of data for the Travel Demand Model.

Products

The Annual Service Plan provides staff and the public with a working document that explains the annual service goals and activities of the Rapid's fixed route transit system. The Long Range Plan will serve as a visionary document, assess current transit service level and its update will allow staff to develop a plan that will form the basis of an expended transit service in the service area for the future.

6.6 REGIS/GVMC

Objectives

To update the REGIS GIS database.

Procedures and Tasks

The funding will provide for the updating of the regional GIS system. The GIS system is used extensively by the Rapid in route planning and as a database for bus stops, bus routes, transit amenities and other major projects. The funds will be used to pay fees and dues for GVMC and REGIS staff to perform data updates and upgrades. Regis dues are paid in order to access Regional Geographic Information System (GIS) data that is collected from the member communities and housed at REGIS. This data is integral to The Rapid's planning activities and is incorporated into all of our short-range and long-range plans including the Long Range Plan update that will be started in August, the BRT project, and the Streetcar feasibility study.

Products

The updating of the regional GIS system used for transit planning.

The Rapid is requesting \$40,000 for GVMC dues, REGIS dues and for internal GIS/software upgrade activities.

6.7 Website Development

Objectives

To increase the functionality and usefulness of the web site for riders and potential riders: contractors and those interested in doing business with ITP: and the community at large by developing and enhancing our web site functionality.

Procedures and Tasks

Using consultant assistance and in-house resources, we will evaluate existing tools and determine if custom development is needed; prepare and integrate data; develop interfaces as needed; and develop content management tools to allow for in-house maintenance. As we continue to expand our social media presence, we will use consultants to assist in developing content as well as the next upgrade to our website, introducing more rider information tools and an interactive purchasing portal.

Products

Tools may include: trip planning, automated notification, mobile applications, and customizable customer databases databases to save trip planning results.

We will also be developing web-based tools related to the long range planning effort to facilitate community involvement and information sharing.

We will be adding functionality to make a more robust purchasing portal to better provide information and reduce paper and other resources.

We will focus on an increased presence in social media to better reach a younger demographic.

6.8 HUMAN RESOURCES and PAYROLL SOFTWARE REPLACEMENT CONSULTANT

Objectives

Additional Funding for Human Resources and Payroll Software Consultant. Consultant help in finding Human Resources and Payroll Software that will meet the need to follow the rules and regulations of Human Resources. Our current software is 10 years old and has changed only through in-house programming. The consultant will have working knowledge of different software packages and real-life experiences with HR and Payroll. The consultant will do a need analysis, help with the RFP, vendor selection, demos, and project implementation.

Procedures and Tasks

- Perform Needs Analysis
- Make recommendations based on vendor software available
- Create Request for Proposal
- Work as a part of the Evaluation team to select appropriate vendor
- Work as part of the team to oversee implementation of successful proposal

Products

- Needs Analysis Report
- Recommendations Report
- Create Request for Proposal
- Assist in the evaluation process of selecting and implementing successful proposal.

7.0 PROGRAM COORDINATION

7.1 Administration

Objectives

Direct staff planning efforts under the FY2010 Unified Work Program, and provide reports on program activities and expenditures to the ITP Board, Metro Council, GVMC transportation Committees, MDOT, and FTA. This task is directed to developing an annual program of planning activities which is in conformity with funding agencies requirements and addresses local issues and priorities.

Procedures and Tasks

Work within this task includes:

- Preparation of monthly progress and billing reports to MDOT on PL FUNDS, STP-U, and CMAQ funded planning activities.
- Preparation of monthly progress reports to MDOT on Section 5303 funded planning activities.
- Preparation of quarterly progress reports to FTA on Section 5307 funded planning activities.
- Provision of reports on program work to the ITP Board and GVMC Committees.
- Participation in meetings and processing of correspondence with MDOT and FTA related to oversight of the planning program.

ITP and GVMC will jointly identify issues and planning activities in consultation with MDOT, FHWA, and FTA. Draft task descriptions and budgets will be prepared for review by the ITP Board, GVMC Committees, GVMC Board, and funding agencies. Comments will be incorporated in the final 2009 UPWP.

Products

Progress reports, year end report, and other documentation will be completed for Metro Council's PL Funds, STP-U, CMAQ, and Section 5303 grants administered by MDOT and ITP's Section 5307 grant administered directly by FTA. As indicated in the Work Program budget for this task, administrative charges will be made as separate line items within each grant budget. Attendance at workshops, seminars, and conferences will be reported to MDOT, and Metro Council Committees.

A GVMC/ITP Unified Work Program for FY2011 will be completed, adopted by Metro Council, and furnished to the funding agencies (FHWA/FTA/MDOT).

Budget

8.0 LAND USE & TRANSPORTATION COORDINATION

Objective

The Land Use Department performs certain activities and tasks within the Transportation process at GVMC. These activities are conducted to more effectively link land use decision-making throughout the region with the creation and adoption of the Long Range Transportation Plan and to guide elements chosen in the Transportation Improvement Plan. This scope of this activity is limited to the MPO boundary area.

Procedures and Tasks

The Land Use Department uses a region-wide approach (sub-regional planning process) to establish new land use patterns in the metro area. These land use patterns are developed through facilitated area-wide meetings involving local planning officials, transportation officials, and others. The resulting plan is known as the Metropolitan Development Framework and forms the basis for regional decision-making for transportation and other infrastructure such as sewer and water and similar public facilities.

Products

Metropolitan Development Framework (MDF) Plan.

Ongoing meetings with GVMC membership to coordinate local existing and planning with the MDF Plan and the Long Range Transportation Plan. This element provides critical socio-economic data inputs for the LRTP.

SE Data for the travel demand model.

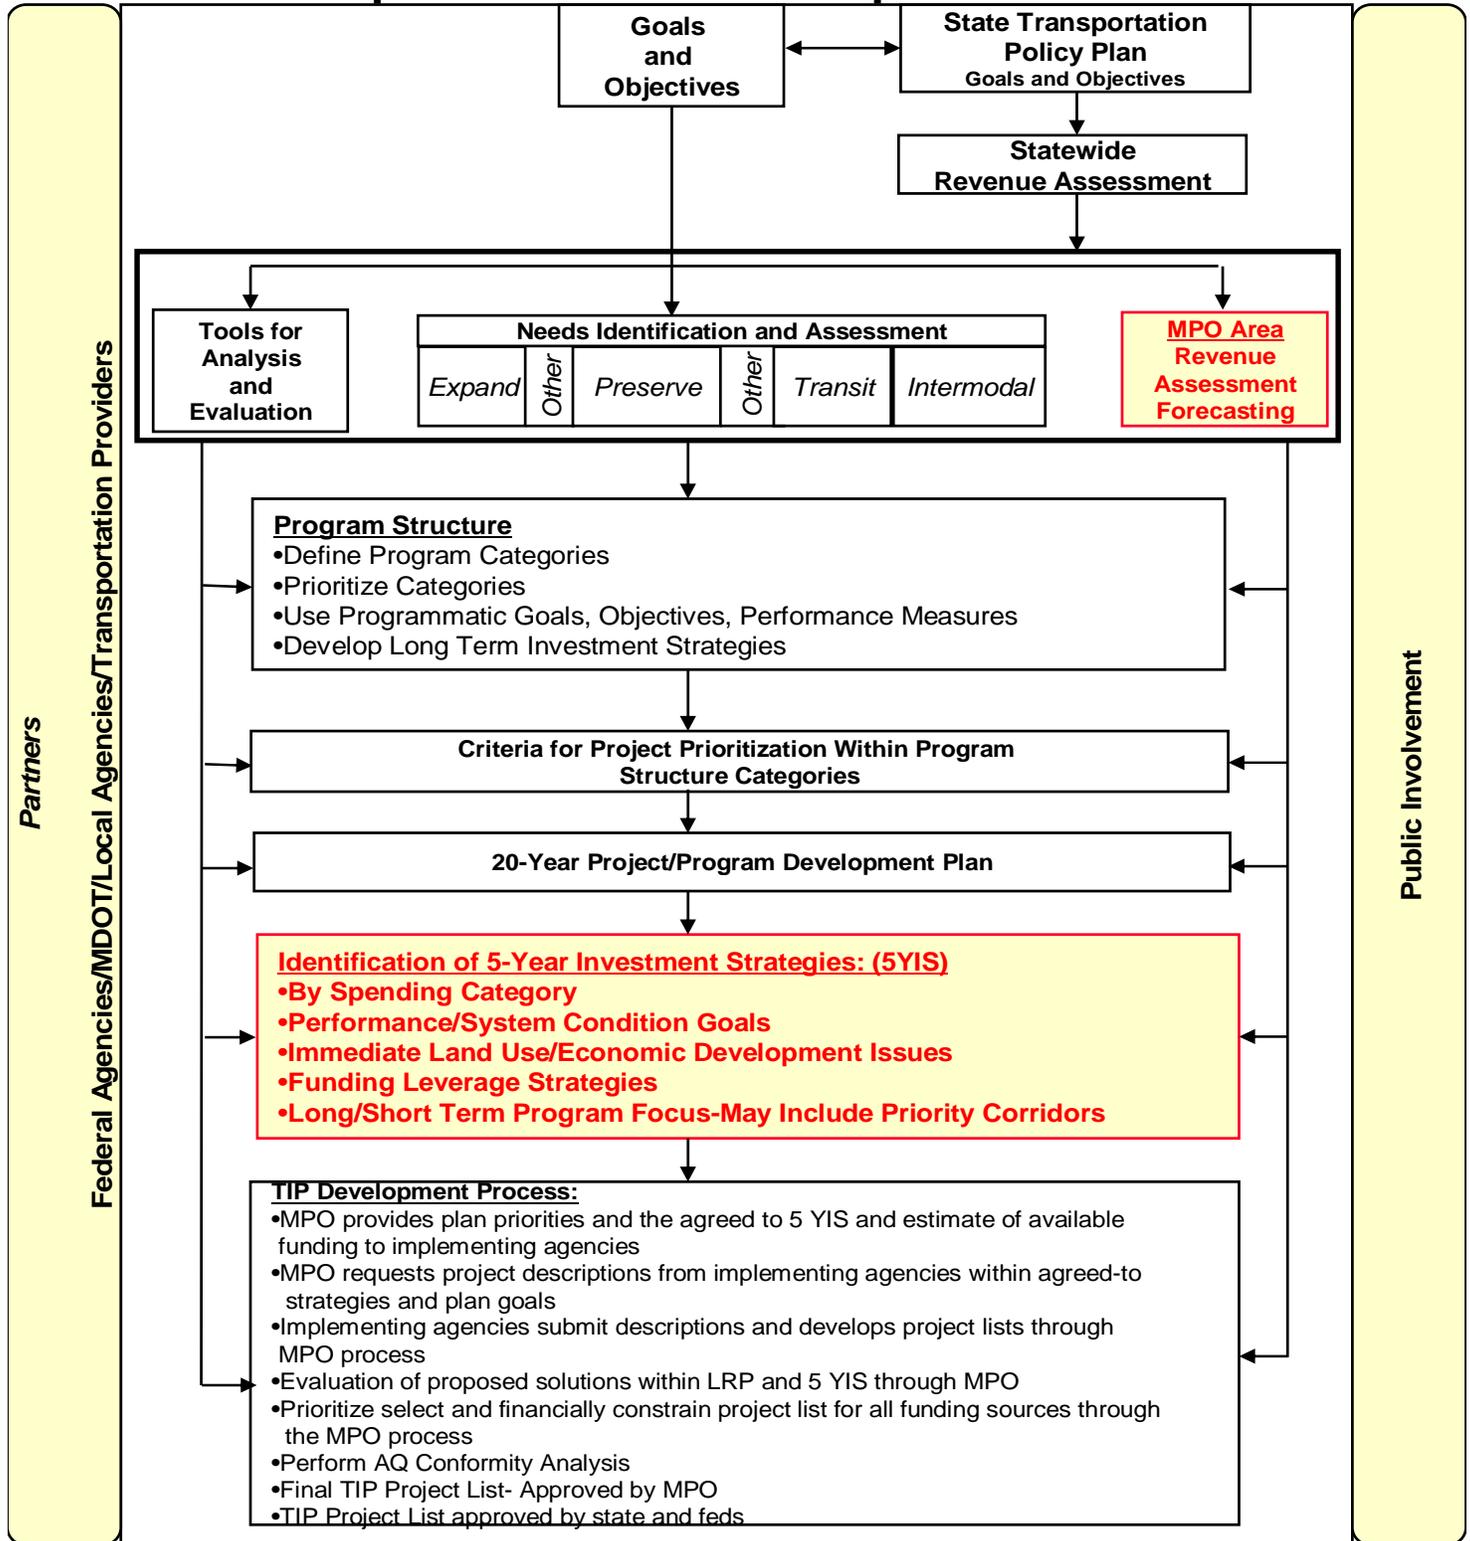

Street cross-sections which match street types to preferred land use development types. Ongoing collaboration with local transportation entities and governmental units to provide examples, case studies and development scenarios with transit oriented development.

Budget

Transportation Plan Development Process

BUDGET BY PERFORMING AGENCY

RESOLUTION OF APPROVAL FOR FY2010 UNIFIED PLANNING WORK PROGRAM

Resolution of the Grand Valley Metropolitan Council approving the Unified Planning Work Program for the Fiscal Year 2010.

WHEREAS the Grand Valley Metropolitan Council, as of January 1, 1992, is the designated Metropolitan Planning Organization (MPO) according to the provisions of title 23 of the U.S. Code, Section 135; and

WHEREAS the 3C urban transportation planning process for the Grand Rapids urbanized area has been certified according to the requirements of 23 CFR 450.114 (c); and

NOW, THEREFORE, BE IT RESOLVED that the Grand Valley Metropolitan Council adopt the Unified Planning Work Program for Fiscal Year 2010.

GVMC Chairperson, Honorable James Buck

Date

Grand Valley Metro Council

Metropolitan Transportation Planning Process Certification

In accordance with 23 CFR 450.334, the Michigan Department of Transportation and the Grand Valley Metropolitan Council the Metropolitan Planning Organization for the Grand Rapids urbanized area hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

- I. 49 U.S.C. Section 5303, 23 U.S.C. 134, and 23 CFR part 405.334;
- II. Title VI of the Civil Rights Act of 1964 and the Title VI Assurance executed by each State under 23 U.S.C. 324 and 29 U.S.C. 794;
- III. Section 1101 of the Transportation Equity Act for the 21st Century (Pub. L. 105-178) regarding the involvement of disadvantaged business enterprises in the FHWA and the FTA funded project (Sec. 105(f), Pub. L. 97-424, 96 Stat. 2100, 49 CFR part 23);
- IV. The provisions of the Americans with Disabilities Act of 1990 (Pub. L. 101-336, 104 Stat. 327, as amended) and the U.S. DOT implementing regulation;
- V. The provision of 49 CFR part 20 regarding restrictions on influencing certain activities; and
- VI. Sections 174 and 176(c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506(c) and (d)). (Note--only for Metropolitan Planning Organizations with non-attainment and/or maintenance areas within the metropolitan planning area boundary).
