## Traffic Crash Facts 2021

September 2022

## **Introduction**

The Grand Valley Metro Council (GVMC) is the designated MPO for Grand Rapids Metro area and is responsible for the traffic safety planning in this area. The crash data assembled by GVMC staff can provide information to the MPO stakeholder and public for the future safety planning and selection of future road projects.

This report includes statistics of crash data for the Grand Rapids Metropolitan Area such as crash facts in 2021, top 50 crash intersections, and top 50 crash segments.

## **Definition**

The terms defined in this report as applied to the crash facts are as follows,

PDO: Number of crashes involving Property Damage Only

Injury: Number of crashes involving injuries, not the number of injuries

A-Type: Number of crashes involving incapacitating injuries

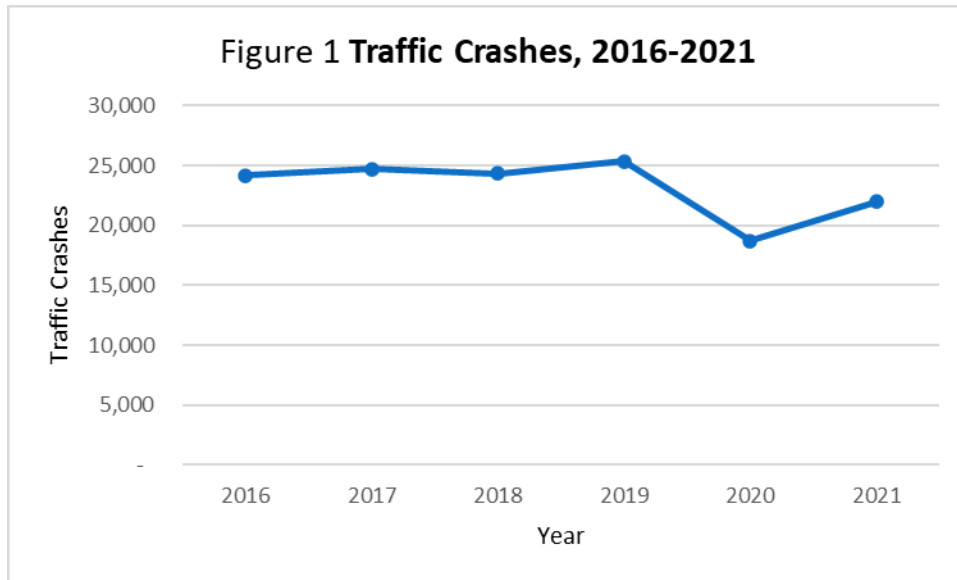

B-Type: Number of crashes involving non-incapacitating injuries

C-Type: Number of crashes involving possible injuries

Fatal: Number of crashes involving fatalities, not the number of fatalities

## All Traffic Crashes

In 2021, there were 21,980 traffic crashes reported in GVMC area. This is an increase of 17.4 percent from 2020. Figure 1 below shows total traffic crashes from 2016 to 2021.
